Dear Municipal Employees,

We recognize the budgetary constraints common to many municipalities and the restraints surrounding event attendance.

In light of this, The Centre for Advancement of Trenchless Technologies (CATT) and The Utility Engineering & Surveying Institute (UESI) is proud to announce that they will be providing the opportunity for municipal employees to attend the Canadian Common Ground International Damage Prevention Symposium for free!

As some of the largest owners of infrastructure, it is very important to have municipal stakeholders participate in the Damage Prevention conversation.

Please join us online for the Canadian Common Ground Alliance International Damage Prevention Symposium, November 16 - 18, 2021.
